

YMCA CAMPING 2012 WISHLIST!

TAX DEDUCTIBLE DONATIONS

Each year we look for new ways to raise money for capital improvements around the camp property. Please help us by sending your tax deductible donation, which will be earmarked for camp projects. You can also contact the Camp Director directly.

YMCA of Kingston, 507 Broadway, Kingston, NY 12401 attn. Lenny Iannizzotto

Email: Liannizzotto@ymcaulster.org Phone: (845) 338-3810 ext. 127

Donations can be monetary, labor or actual donation of the following items. Your help will ensure that we are running the best possible camping programs this year!

Logger/Tree Service:

To come in and drop dead limbs and trees; removal not necessary

Woodchips!

Woodchips!

Camp can never have enough woodchips to prevent erosion and washout areas.

Gravel! Gravel!

To surface the parking areas and fishing wall; prevents erosion and mud in high traffic areas

Sand! Sand! (Ok, too much?)

We need fresh sand for our beach and sandbox areas.

Wooden Sheds:

For more storage space, rainy day areas, and organization

Lumber/Building

Supplies:

Camp ALWAYS needs lumber, nails, screws, etc.

Shed Placement

We have a wonderful new shed just waiting to be used, but it needs to be moved from its current location. Shed size is approx. 20'x20'

Refrigerators:

To replace the older, non-working ones used to store campers' lunches.

Music:

Instruments, Amps, Microphones, monitors, etc. for our music program

Fishing Poles:

We continually replace the ones that break. Drop line only please.

Arts & Crafts

Supplies:

Toilet paper rolls, paint, construction paper, brushes, beads, tape, crayons, markers, etc.

Canoes/Kayaks/Row

Boats:

Camp could use some fresh boats and oars, as well as life preservers. The more boats we have, the more campers that can go out at one time.

Lawnmower:

We currently use a few lawnmowers that have well exceeded their life. Camp would welcome a ride on or push mower in good working condition.

Electrician:

Many of our electrical wires are old and in need of replacing and updating. Any help electricians can give would be appreciated.

Thank you for your support!
